OPERATING RESULTS

MAXIM's continuing operations are comprised of the HR Milner generating facility ("Milner") and MAXIM's corporate activities. Milner has not generated electricity since April 2017 due to low Alberta power prices. Accordingly, results for the first quarter of 2018 reflect limited activities compared to the first quarter of 2017.

During the first quarter of 2018, net loss attributable to shareholders from continuing operations decreased in the first quarter of 2018 when compared to 2017. The change in this financial measure was primarily due to operating cost savings from cost cutting initiatives and the temporary suspension of operations at Milner. This was partially offset by realized gains on commodity risk management activities in the first quarter of 2017.

INTENTION TO RESUME OPERATIONS AT MILNER

As previously reported, MAXIM has been monitoring both settled and forward power and gas prices with a view of resuming operations at Milner in 2018. Alberta forward power prices have improved since the start of 2018 and MAXIM currently intends to restart Milner mid-2018. To this end, MAXIM has recalled certain staff and is completing outage work at Milner in preparation for the restart.
